

Name: Monika. Vurigity & Shamini Puthooppallil Baby
Student Id: 3675394 & 3674381

Instructions on how to execute the script file

- There is one python notebook file turnover.ipynb, also the dataset file turnover.csv download them.
- Open Jupyter Notebook in Anaconda Navigator.
- In home the turnover.ipynb will be available, open that.
- Change the file storage path in the import statement and the run the code.
- To view the decision tree please download the turnover.dot file copy the text in this file and paste it in the following link:
<https://dreampuf.github.io/GraphvizOnline/>.

Note:

We have reduced the size of decision tree in order to fit in the report to have clear view of the decision tree please follow the step 5.
